Accident Description/Nature of Injury:

• Claimant was reading water meters, lifted manhole cover and then dropped on left foot, fracturing same.

Investigation/Compensability

• The accident was witnessed and injury not questioned.

Medical Management

• The city's doctor made ortho referral and we directed care to Dr. Morgan who recommended surgery to set first metatarsal with hardware. Surgery performed 5/27/16.

Periods of Disability

• He has been off since the injury. Note that he has been released to modified duty on 5/31/16 but the city has refused to provide.

Indemnity

- TTD: Reserves reflect 14 weeks.
- PPD: Reserves reflect 15% to foot.

Subrogation/Other Issues

• No sources for subrogation or contribution. Claimant is a diabetic which may prolong bone healing.

Plan of Action:

• I will follow-up with him after every doctor visit to maintain control and learn his medical progress. I will continue to strive for early return to work. Once he is released MMI, I will request a disability rating, negotiate settlement, obtain Division approval and close file.

LKM Contract Discussion Points

- 1. Agreement (three years?)
 - Endorsement
 - Contract for Services
 - Separate fee schedule for each
 - Membership in LKM no longer a requirement
 - Total expected/projected expenditure \$25K?
 - Suggest we choose the elements and ask LKM to suggest the fees...then negotiate from that point
- 2. Revise Bylaws, to remove LKM membership requirement and do some minor misc. cleanup
 - Must be completed early in 2017
 - Advance notification to membership
 - Voted on at Annual Meeting **OR** by mail

KANSAS MUNICIPAL INSURANCE TRUST

ACTUARIAL ANALYSIS OF FUNDING AND UNPAID CLAIM LIABILITIES AS OF DECEMBER 31, 2015

INTRODUCTION

Milliman, Inc. (Milliman) has been retained by the Kansas Municipal Insurance Trust ("KMIT" or the "Trust") to conduct an actuarial analysis to:

- Estimate the unpaid claim liabilities as of December 31, 2015;
- Provide funding estimates for 2016; and
- Provide the above funding estimates on a discounted basis and at various probability levels.

The purpose of our analysis is to assist the Trust in preparing its financial statements. Our analysis is based on data evaluated as of December 31, 2015 and information provided through the date of this report.

The Trust is an interlocal governmental agency formed for the purpose of establishing and administering a group funded workers' compensation pool pursuant to the provisions of Kansas state law governing labor and industries. The Trust began operations on January 1, 1994 and provides a comprehensive workers' compensation insurance program for participating members of the League of Kansas Municipalities. In addition to insurance coverage, the program provides risk management services with an emphasis on loss control, claims administration and management information services.

KMIT limits its exposure to loss by purchasing both per occurrence and aggregate excess insurance. A summary of KMIT's excess insurance program is provided on Exhibit 1.

Our estimates are provided on an undiscounted and discounted basis with respect to the time value of money. Our estimates are net of insurance recoverables and include defense and cost containment expenses (ALAE), but do not include other claims administration expenses.

There have been no material changes in procedures, methodology or significant assumptions used in deriving our estimates since our last analysis performed as of December 31, 2014.

In this report, we are using the terms "loss" or "unpaid claim liability" to represent the sum of the medical loss, indemnity loss and allocated loss adjustment expense (ALAE) components on each claim, unless otherwise noted. Certain items are not considered, specifically administrative costs and the overhead costs of claims handling (commonly referred to as unallocated loss adjustment expenses or ULAE).

Mindy M. Steichen is a Fellow of the Casualty Actuarial Society and Member of the American Academy of Actuaries (AAA) and meets the Qualification Standards of the AAA to render the actuarial opinion contained herein.

^{*} The 1997 and 1999 year incurred and paid losses exceed the aggregate retention. Ultimately KMIT should recover losses excess of the aggregate retention from Safety National.

The total unpaid claim liability includes a provision for case reserves, expected development of case reserves, incurred but not reported (IBNR) reserves, allocated loss adjustment expense reserves and excess insurance recoveries. We have not estimated a provision for claims administration expenses. The estimates in the above table are net of KMIT's excess insurance protection, and are shown on an undiscounted (full value) basis. We have not included a provision for KMIT's exposure above its aggregate excess insurance.

The estimates presented above can be characterized as actuarial central estimates and represent an expected value over a range of reasonably possible outcomes. They do not reflect all conceivable extreme events where the contribution of such events to an expected value is not reliably estimable. The estimates are not defined by a precise statistical measure (i.e., mean, median, mode, etc.), but are selected from multiple indications produced by a variety of generally accepted actuarial methods.

Our actuarial central estimate of KMIT's ultimate loss for the January 1, 2016 to December 31, 2016 fund year is \$3.71 million on an undiscounted basis and \$3.65 million discounted at a yield rate of 0.69%. The following table displays our estimated funding amounts at various probability levels:

GENERAL APPROACH

We used four projection techniques to develop estimates of the ultimate losses. The unpaid claim liability was then derived by subtracting losses paid as of December 31, 2015 from the estimated ultimate losses. The following methods were used to project ultimate losses:

- Incurred loss development projection;
- Paid loss development projection;
- Incurred Bornhuetter-Ferguson projection; and
- Paid Bornhuetter-Ferguson projection.

Loss Development Methods

Incurred losses are defined as paid losses plus reported reserves on open claims (case reserves). The incurred loss development method derives an estimate of ultimate losses by multiplying the incurred losses by an incurred loss development factor. The loss development factor reflects expected development from late reported claims (IBNR) and reopened claims, as well as from changes in the aggregate value of case reserves as accident years mature. When necessary, we have supplemented KMIT's historical experience with external data sources in selecting development factors (Exhibit 2). Specifically, we referenced insurance industry experience for workers' compensation business in Kansas and countrywide.

The paid loss development method derives an estimate of ultimate losses by multiplying paid losses by a paid loss development factor. Again, we considered Kansas and countrywide workers' compensation experience in our selection of paid loss development factors (Exhibit 4). The paid loss development factors reflect the expected relationship between ultimate losses and paid losses through December 31, 2015.

Exhibits 3 and 5 display the results of the incurred and paid loss development projections.

Bornhuetter-Ferguson Methods

The Incurred Bornhuetter-Ferguson method derives ultimate losses by adding an estimated IBNR amount

to the losses reported to date. The estimated IBNR was based on an initial estimate of the ultimate losses

(a priori estimate) and an estimated reporting pattern for incurred losses. The a priori loss estimates for

fund years 1994 through 2015 were based on our December 31, 2014 analysis of ultimate losses.

We relied on the development pattern underlying the incurred loss development projection method to select

a reporting pattern. Specifically, the estimated percentage unreported is equal to one minus the reciprocal

of the cumulative incurred loss development factor. Estimated ultimate losses were then derived by adding

the estimated IBNR to the incurred losses as of December 31, 2015.

The Paid B-F method derives ultimate losses by adding an estimated unpaid amount to the paid losses to

date. The estimated unpaid loss was calculated by taking one minus the reciprocal of the cumulative paid

loss development factor multiplied by the a priori loss estimate.

Exhibits 6 and 7 display the results of the incurred and paid B-F projections.

Based on the projection methods outlined above, we selected the net ultimate loss estimates by accident

year, as displayed on Exhibit 8.

Unpaid Claim Liabilities

The unpaid claim liability was derived by subtracting the cumulative paid loss and ALAE through December 31, 2015 from the estimated ultimate loss and ALAE. Exhibit 9 displays the calculation of the net unpaid claim liabilities, as well as the net IBNR, which is equal to the total net unpaid claim liabilities less the net case reserves as of December 31, 2015.

The negative IBNR amounts in the 1997 and 1999 fund years are due to the fact that incurred losses exceed the aggregate retention for those years. KMIT expects to fully recover the losses excess of the aggregate retention from its excess insurer. KMIT has made payments and has case reserves in excess of the aggregate retention. IBNR for 1997 and 1999 reflects aggregate recoveries already received of \$300,247 and \$111,920, respectively. Additional recoveries are expected.

FUNDING ANALYSIS

Exhibit 10 derives our projection of KMIT's ultimate losses for accident year 2016. Our projections were based on KMIT's historical loss experience as well as aggregate Kansas workers' compensation loss experience (adjusted to reflect KMIT's risk profile). Our selected ultimate losses were used to calculate pure premiums (ultimate loss per \$100 payroll) for accident years 2006 through 2015. These pure premiums were adjusted for:

- Changes in the self-insured retention;
- Changes in benefit levels (Exhibit 11); and
- Trends in average claim costs (1.0% per year).

The selected 2016 pure premium (row 8) was multiplied by the projected 2016 payroll to estimate the ultimate loss, prior to aggregate excess insurance (row 10).

We have provided funding estimates on both an undiscounted and a discounted basis. Undiscounted values are the nominal estimates of claims to be paid in the future and do not reflect the time value of money. The discounted value reflects the amount of assets which, when combined with investment earnings on these assets assumed to accumulate at a specified yield rate, are estimated to be sufficient to pay all claims. We used a 0.69% yield assumption, as provided by KMIT. The selected payout pattern is shown on Exhibit 12, and the resulting present value factor is displayed on Exhibit 13.

It is not uncommon for self-insured entities to fund at levels which include a margin for adverse loss experience. One way to accomplish this is to fund at a probability level greater than the actuarial central estimate. For purposes of developing estimates at various probability levels, the actuarial central estimates presented in this report (both undiscounted and discounted) represent expected value estimates. As such, when the ultimate cost of the claims is known, there is approximately an equal probability that the actual value will be higher or lower than the estimated value. To estimate liabilities at various probability levels,

we relied on an insurance industry based distribution of aggregate workers' compensation losses, adjusted to reflect characteristics of KMIT's loss experience. The resulting unpaid claim liabilities at various probability levels are displayed on Exhibit 14.

We know of no specific requirement that a public entity fund at a given probability level. The funding level is a reflection of the entity's risk tolerance, as well as the availability of funds from other sources in the event the self-insurance fund falls short of the paid amounts. There is always a chance that the balance in the fund will not be sufficient to meet the claims that will be charged against it. While we believe a self-insured entity should recognize the potential risk of assuming its own claim liabilities, there is no simple formula that we know of to decide how much self-insured exposure is prudent. Of course, budget and risk considerations may play a role in the decision.

The range of values displayed in the exhibits (in particular the 95th percentile) does not represent the highest or lowest possible values of the discounted loss and ALAE claim liabilities. Potential variation around these values exists, both due to uncertainty with respect to the amount, as well as timing of future payments along with the investment yield.

QUALIFICATIONS AND LIMITATIONS

The actuarial methodology used in this report assumes that case reserves on reported claims are consistently estimated based on current facts known about the claims as of the date of valuation. No independent review of any specific claim files has been performed by Milliman.

In estimating KMIT's unpaid claim liabilities, it is necessary to project future loss and ALAE payments. It is certain that actual future losses and ALAE will not develop exactly as projected and may vary significantly from our projections. Further, our projections make no provision for future emergence of new classes of losses or types of losses (such as cumulative trauma claims), which are not sufficiently represented in KMIT's historical database or which are not yet quantifiable.

In performing this analysis, we have relied on data and other information provided to us by KMIT. We have not audited or verified this data and other information. If the underlying data or information is inaccurate or incomplete, the results of our analysis may likewise be inaccurate or incomplete. In that event, the results of our analysis may not be suitable for the intended purpose.

We performed a limited review of the data used directly in our analysis for reasonableness and consistency and have not found material defects in the data. If there are material defects in the data, it is possible that they would be uncovered by a detailed, systematic review and comparison of the data to search for data values that are questionable or relationships that are materially inconsistent. Such a review was beyond the scope of our assignment.

The sensitivity of key variables in this analysis was considered. Key variables include the selected loss development tails, trend factors, and pure premiums. The overall results are potentially sensitive to these key variables, and reasonable alternative selections could change the results in either direction.

- 13 -

KMIT's data was supplemented with insurance industry data where deemed necessary, such as loss development factors where credible data was not available. The use of external data is another source of uncertainty in our estimates.

The emergence of individual large losses (or changes in case reserves on existing open claims) could materially change our results. We cannot predict the timing of large losses, but their possibility increases the uncertainty inherent in our estimates.

Milliman is not expressing an opinion as to the appropriateness of discounting KMIT's unpaid claims liabilities for financial reporting. We have not examined KMIT's current investment portfolio nor its current investment philosophy. In estimating KMIT's discounted loss reserves, we used an annual effective interest rate of 0.69%. The interest rate was provided to us by KMIT and is based on its assessment of its investment returns. KMIT selected the interest rate because KMIT has greater familiarity with the potential investment returns on its assets. The selected interest rate does not conflict significantly with what, in our opinion, would be reasonable for the purpose of this assignment.

Future rates of return are not guaranteed and may exceed or fall below the assumed rate. Also, the actual timing of loss payments is subject to variability. Differences between actual and expected rates of return and timing of payments from those underlying our estimates may have a material effect on the amount of the discount. Further, our projections assume the existence of valid assets underlying the unpaid claim liabilities and that these assets are appropriate to meet the cash flow needs of KMIT. We have not reviewed the held assets.

Finally, KMIT insures part of its exposure to limit its liability for losses. Our estimates are presented on a net basis with respect to excess and aggregate insurance recoverables. We have not made any provisions for uncollectible excess or aggregate insurance.

- 14 -

We did not review the actual excess and aggregate insurance contracts of KMIT but relied on summaries

of the terms of the contracts provided by KMIT. Our results, net of excess insurance, assume that all excess

insurance is valid and collectible. We are not able to assess the potential for uncollectible excess insurance

without performing a substantial amount of additional work beyond the scope of our assignment. We have

not anticipated any contingent liabilities that could arise if the excess insurers do not meet their obligations

to KMIT as reflected in the data and other information provided to us.

To the Board of Trustees Kansas Municipal Insurance Trust

We have audited the financial statements of Kansas Municipal Insurance Trust (KMITI) for the year ended December 31, 2015, and have issued our report thereon dated May 25, 2016. Professional standards require that we provide you with information about our responsibilities under generally accepted auditing standards, as well as certain information related to the planned scope and timing of our audit. We have communicated such information in our letter to you dated January 14, 2016, Professional standards also require that we communicate to you the following information related to our audit.

Significant Audit Findings

Qualitative Aspects of Accounting Practices

Management is responsible for the selection and use of appropriate accounting policies. The significant accounting policies used by KMIT are described in Note 1 to the financial statements. We noted no transactions entered into by KMIT during the year for which there is a lack of authoritative guidance or consensus. All significant transactions have been recognized in the financial statements in the proper period.

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ significantly from those expected. The most sensitive estimate affecting the financial statements was:

Management's estimate of the reserve for unpaid claims is determined using case basis evaluations and statistical analyses. We evaluated the key factors and assumptions used to develop the reserve for unpaid claims in determining that it is reasonable in relation to the financial statements taken as a whole.

Certain financial statement disclosures are particularly sensitive because of their significance to financials statement users. The most sensitive disclosers affecting the financial statements were:

The disclosure of reserve for unpaid claims in Note 6 to the financial statements. The reserve for unpaid claims represents an estimate of the ultimate settlement of losses incurred through December 31, 2015. Management engaged an outside actuary to determine the sufficiency of the reserve for losses estimated at December 31, 2015. The reserve is estimated based on management's evaluation of the actuarial study and its own evaluation of reported claims and an estimated for claims incurred but not reported. The accuracy of these estimates cannot be determined prior to the ultimate settlement of each claim. Accordingly, the ultimate cost of settling these claims may vary significantly from the liabilities recorded.

The financial statement disclosures are neutral, consistent, and clear.

Difficulties Encountered in Performing the Audit

We encountered no significant difficulties in dealing with management in performing and completing our audit.

Corrected and Uncorrected Misstatements

Professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that are trivial, and communicate them to the appropriate level of management. Management has corrected all such misstatements.

Disagreements with Management

For purposes of this letter, professional standards define a disagreement with management as a financial accounting, reporting, or auditing matter, whether or not resolved to our satisfaction, that could be significant to the financial statements or the auditor's report. We are pleased to report that no such disagreements arose during the course of our audit.

Management Representations

We have requested certain representations from management that are included in the management representation letter dated May 25, 2016.

Management Consultations with Other Independent Accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a "second opinion" on certain situations. If a consultation involves application of an accounting principle to the KMIT's financial statements or a determination of the type of auditor's opinion that may be expressed on those statements, our professional standards require the consulting accountant to check with us to determine that the consultant has all the relevant facts. To our knowledge, no other accountant has been consulted.

Other Audit Findings or Issues

With respect to the supplementary information accompanying the financial statements, we made certain inquiries of management and evaluated the form, content, and methods of preparing the information to determine that the information complies with statutory basis of accounting principles, the method of preparing it has not changed from the prior period, and the information is appropriate and complete in relation to our audit of the financial statements. We compared and reconciled the supplementary information to the underlying accounting records used to prepare the financial statements or to the financial statements themselves.

We generally discuss a variety of matters, including the application of accounting principles and auditing standards, with management each year prior to retention as KMIT's auditors. However, these discussions occurred in the normal course of our professional relationship and our responses were not a condition to our retention.

This information is intended solely for the use of Board of Trustees and management of KMIT and is not intended to be and should not be used by anyone other than these specified parties.

Very truly yours,

Summers, Spencer & Company, P.A.

Independent Auditors' Report

To the Board of Trustees Kansas Municipal Insurance Trust

We have audited the accompanying statutory financial statements of Kansas Municipal Insurance Trust, which comprise the statutory-basis balance sheets as of December 31, 2015 and 2014 and the related statutory-basis statements of revenue, expenses, and changes in fund balance, and cash flows for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with the financial reporting provisions prescribed or permitted by the Kansas Insurance Department. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles

As described in Note 1, these financial statements were prepared by Kansas Municipal Insurance Trust on the basis of the financial reporting provisions prescribed or permitted by the Kansas Insurance Department, which is a basis of accounting other than accounting principles generally accepted in the United States of America, to meet the requirements of the Kansas Insurance Department. The effects on the financial statements of the variances between the regulatory basis of accounting described in Note 1 and accounting principles generally accepted in the United States of America, although not reasonably determinable, are presumed to be material.

Adverse Opinion on U.S. Generally Accepted Accounting Principles

In our opinion, because of the significance of the matter discussed in the Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles paragraph, the financial statements referred to in the first paragraph do not present fairly, in accordance with accounting principles generally accepted in the United States of America, the financial position of Kansas Municipal Insurance Trust as of December 31, 2015 and 2014, or the results of its operations or its cash flows for the years then ended.

Opinion on Regulatory Basis of Accounting

In our opinion, the financial statements referred in the first paragraph present fairly, in all material respects, the admitted assets, liabilities, and fund balance of Kansas Municipal Insurance Trust as of December 31, 2015 and 2014 and the results of its operations and its cash flows for the years then ended, in accordance with the financial reporting provisions prescribed or permitted by the Kansas Insurance Department as described in Note 1.

Other Matter

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The schedule of administrative expenses, statements of revenues, expenses and changes in fund balance and statements of revenue, expenses and changes in fund balance cumulative activity by contract period are presented for purposes of additional analysis and are not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

NOTES TO FINANCIAL STATEMENTS

Note 1 - Description of business and ownership

Organization and nature of operations

Kansas Municipal Insurance Trust ("Trust") is an interlocal governmental agency formed for the purpose of establishing and administering a group funded workers compensation pool ("Pool") pursuant to the provisions of Kansas state law governing labor and industries. The Trust began operations on January 1, 1994 and provides a comprehensive workers' compensation insurance program for members of the League of Kansas Municipalities. In addition to insurance coverage, the program provides risk management services with emphasis on loss control, claims administration, and management information services.

Each member of the Pool has jointly and severally agreed to assume, pay, and discharge all applicable liabilities under the Kansas Workers' Compensation Act, 581, et. seq., and all lawful orders of the Commissioner of Insurance; and each member has agreed to pay any premiums, taxes, and assessments as may be required by the Board of Trustees.

Note 2 – Summary of accounting policies

Basis of accounting

The accompanying financial statements have been prepared in conformity with accounting practices prescribed or permitted by the Kansas Insurance Department and are not in conformity with generally accepted accounting principles followed by other business enterprises. The reporting requirements of regulatory authorities are designed primarily to demonstrate ability to meet claims of policyholders. Pursuant to such statutory practices:

- (1) Investments are comprised of U.S. Government securities, corporate bonds, stocks and deposits with banks and are carried in accordance with the accounting practices as prescribed by Kansas Statutes.
- (2) Premium income is recognized as earnings on a pro-rata basis over the periods covered by the policies. The related acquisition costs, such as commissions, premium taxes and other items, are charged to current operations as incurred.
- (3) Computer software, office furniture and fixtures, and accounts receivable over ninety (90) days past due, or otherwise not considered collectible, if any, are charged-off against the fund balance. (4) Subrogation recoverable is not recognized.
- (5) Non-admitted assets such as prepaid expenses and other assets no specifically identified as an Admitted asset within the NAIC's Accounting Practices and Procedures Manual are excluded from The accompanying balance sheets and are charged directly to members' equity for statutory purposes.

No determination has been made of the effect of such differences on the accompanying financial statements.

Reserves for unpaid workers compensation claims

The reserve for workers' compensation claims is determined using case basis evaluations and statistical analyses, and represents estimates of the ultimate net cost of all losses and claims incurred through the end of the contract year.

NOTES TO FINANCIAL STATEMENTS

Excess insurance

The Trust obtained insurance coverage for workers' compensation claims in excess of \$750,000 per occurrence for the period from January 1, 2015 to January 1, 2016 and \$750,000 per occurrence for the period from January 1, 2014 to January 1, 2015. The actual amount recoverable from the excess insurer depends on the ultimate claims settlements.

Concentration Risk

The Trust's direct premiums earned consist solely of amounts from members of the Pool. These members are all located within the State of Kansas. The Trust does not require collateral.

Excess insurance losses for applicable years are contractually transferred to an excess carrier. The Trust does not require collateral from its excess carrier.

Cash and cash equivalents

The Trust considers all highly liquid investments to be cash equivalents, including deposit accounts and all certificates of deposit.

The Company has cash in excess of the \$250,000 FDIC insured limit at Commerce Bank. Cash accounts at Commerce Bank exceeded the Federal limit by \$1,425,327 at December 31, 2015 and has no agreement in place to cover these excess funds.

Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates. Significant estimates that are subject to change in the near term relate to the estimates for reserves for unpaid workers' compensation claims.

Note 3 - Cash allocation

Cash is allocated between administrative and claims funds as follows:

| | <u>2015</u> | <u>2014</u> |
|------------------------------------|---------------------|--------------------------------|
| Cash-administrative Cash-claims | \$ 756,379 | \$ 183,238 <u>1,311,575</u> |
| Total cash and cash equivalents | <u>\$ 1,914,612</u> | <u>\$ 1,494,813</u> |

Note 4 - Investments

Investments consist of debt securities. It is the intent of the Trust to hold investments to maturity. Debt securities are carried at amortized cost which approximates fair value. The Trust follows a policy of amortizing to an early call date, if any, rather than to the maturity date.

At December 31, 2015 and 2014, fair value, gross unrealized losses and amortized cost of investments were as follows:

| | | | 2015 | | | | | |
|--------------------------------------|------------------------|------------------------|------|------------------------------|----------|----|-----------------------------|------------------------|

Note 5 - Fair value measurements

FASB ASC 820 establishes a framework for measuring fair value, that framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value, it consists of three levels:

- Level 1 Valuation is based upon quoted prices for identical instruments traded in active markets.
- Level 2 Valuation is based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market.
- Level 3 Valuation is generated from model-based techniques that used significant assumptions not observable in the market.

NOTES TO FINANCIAL STATEMENTS

The following tables set forth, within the fair value hierarchy, the Trust assets measured at fair value on a recurring basis as of December 31, 2015 and 2014:

Note 6 - Reserve for unpaid workers' compensation claims

The reserve for unpaid workers' compensation claims represents an estimate of the ultimate settlement of losses incurred through December 31. Management engaged an outside actuary to determine the sufficiency of the reserve for losses estimate at December 31, 2015 and 2014. The reserve is estimated based on management's evaluation of the actuarial study and its own evaluation of reported claims and an estimate for claims incurred but not reported. The accuracy of these estimates cannot be determined prior to the ultimate settlement of each claim. Accordingly, the ultimate cost of settling these claims may vary significantly from the liabilities recorded.

The components of the loss reserve at December 31, 2015 and 2014 are as follows:

| | <u>2015</u> | <u>2014</u> |
|--|---------------------|--------------|
| Reported claims | \$ 2,192,769 | \$ 2,546,138 |
| Claim adjustment expenses | 222,647 | 249,725 |
| Reserve for incurred but not reported claims | 4,163,737 | 3,404,260 |
| | <u>\$ 6,579,153</u> | \$ 6,200,123 |

Note 7 - Taxes, licenses and fees, due and accrued

The Division of Workers' Compensation fee and the Second Injury Fund assessment are based on certain percentages of losses. The percentages are established by the Director of Workers' Compensation and the Kansas Insurance Department, respectively. The percentages applicable to the year ended December 31, 2015 have not been released, so the fees and assessments included in the financial statements have been estimated using the prior year percentages. Since fees and assessments are based on losses, the ultimate amounts payable will depend on the ultimate claim settlements, as well as on the final percentages established. Accordingly, the actual amounts payable may vary significantly from the estimated amounts included in the financial statements.

Note 8 - Deposits on premiums

Deposits on premium of \$775,849 and \$1,014,404 represent premiums for the 2016 and 2015 contract years collected prior to December 31, 2015 and 2014, respectively.

Marketing Plan

Draft
February 2002

KMIT Marketing Plan

KMIT's Marketing Plan is rooted in the following four concepts: Service Delivery, Primary Market Identification, Branding, and Agent Participation.

Service Delivery

The most important question to be answered when marketing ANY company or ANY product is, "what is it that the company or product 'IS'; in other words, exactly what is being 'sold' (marketed)". Without a doubt, KMIT is about SERVICE. KMIT sells SERVICE. (Price is important, but is NOT what sustains growth in KMIT over the long haul. Only five cities have left KMIT during its 8-year history. Certainly SERVICE is what keeps KMIT members in the pool, over the long haul.)

During 2001, KMIT grew from 88 to 100 members (after having very little growth over the preceding several years), an increase of 13.6%. 2002 is expected to be another rapid growth year. Clearly, KMIT is evolving into a very large business, with total annual premiums possibly climbing to as high as \$3 million in the not-too-distant future.

Maintaining a business of the size to which KMIT has grown means one thing: service delivery. A SERVICE attitude and perspective must be maintained, not only to sustain the needs of the current membership, but also to

identify for prospective members that KMIT understands what it is, and lives a "service first" motto. A reputation for providing excellent "service" is at the heart of a successful business, and KMIT IS a business.

Among the specific service-delivery needs identified as those to which KMIT must achieve excellence are:

Risk Management—services currently provided by IMA are viewed by our "customers" as top quality. This aspect of our service must be kept at a very high level, and also at the forefront of any marketing plan. The city visits and the Safety Olympics are strong components of our RM program, and also serve as a vital marketing tool.

Claims Management—This IMA service is also seen as of the highest quality. Frankly, Victoria is one of our best attributes, and we should "use" her extensively in marketing our pool. Additionally, effort to strengthen this component (via city supervisor training on "return to work" issues, etc.) should be considered, as cost containment will become an even greater challenge for KMIT as it goes through a very significant change in size.

"Home Office" response—the League staff at KMIT must endeavor to remain highly service—oriented. The motto, "The customer is always right" does apply to KMIT. Prompt, accurate and friendly responses to the needs of our current and prospective members must be one of

our highest priorities. KMIT IS a business, and must be operated like a business.

"City-to-City", "Face-to-Face Interaction"-the pool administrator/agent (and, from time to time, the program manager/agent) will continue to "market" KMIT, both to existing and prospective cities as he/she also serves as the "field rep" for the League. The value of this type of marketing is sometimes difficult quantify, but is significant-not only contribute to continued "good feelings" of current members, but also as a sure-fire way to get the message out to possible new members. (City folks do talk to other city folks.) is another important service aspect. Customers want to SEE the people they do business with. And, when THEY can't see them, they at least will know that somebody is seeing them (through the "On The Road" pieces in the Journal, etc.).

The role of email and the internet, to supplement and complement face-to-face contact, is also a must in a modern successful service and marketing concept, and is certainly a big part of the KMIT philosophy.

"Regional Training"—Work in this area should not only help reduce costs, as mentioned above, but is also represents a great way to get the KMIT name out to all cities.

Primary Market

In August of 2001, KMIT staff studied the "demographics" of the universe of current and

prospective KMIT members, starting with the universe of all LKM members (a requirement of membership in KMIT). At that time, it was discovered that a very high percentage of all current KMIT members came from a fairly definitive subgroup of all LKM members-that grouping being those cities with populations between 1,500 and 10,000. At that time (August 2001), there were 119 cities in the above size range, and 47 of those were KMIT members (out of 99 KMIT member cities). So, nearly one half of KMIT city/members were between 1,500 and 10,000; with the other "half" (52 membbers) coming from the remaining 409 LKM cities. Obviously, for some reason, the KMIT pool has tended to "fit" that range of cities so well over the years. Why? ._

KMIT has flourished in the above population cities (those in the Primary Market range) best because those cities can best utilize KMIT's services—namely its emphasis on risk and claims management. The smallest cities tend to have too few employees to develop "real" safety programs, etc., even with IMA's help. The larger cities tend to have in-house risk management programs, and the largest ones tend to be self-insured in work comp.

Additionally, the smallest cities tend to represent much more monetary risk than benefit to the pool. Since the pool is first and foremost a business, the smallest cities are not seen as a good business risk, though ALL LKM members remain eligible for KMIT membership.

In terms of marketing the pool, the Primary Market will get the most attention of the agents and the marketing program. KMIT will certainly continue to market to the larger cities (especially those between 10,000 and 20,000, seen as a part of the "Secondary Market"), and to the cities between 1,000 and 1,500; the other portion of the Secondary Market. Marketing to cities under 1,000 will be mostly incidental, but those cities will be "worked" just as the others when they seek KMIT membership information.

Field trips made by the Pool Administrator and agents (while fulfilling other LKM duties and responsibilities), will include stops in Primary Market cities whenever possible, and those cities will be given "weight" when planning travel routes and times, etc. Other marketing tools, such as periodic mailings, etc. (in 2001, a few selected "primary" cities received Christmas cards, for example) will also emphasize the Primary Market cities.

Use of the terms "Primary" and "Secondary" are meant to reflect the marketing effort on the part of the KMIT staff—based on the realistic understanding of which size cities best "fit" the KMIT "model", for all the reasons outlined above. In NO WAY is ANY LKM city seen as inferior to any other as a result of this business—oriented marketing plan classification process. KMIT certainly continues to quote any LKM city which is interested in the work comp pool, and will welcome in any such city with open arms.

Branding

The first and most important aspect of branding was addressed early in the Service Delivery section (above), and that is deciding who we are. Branding is the process of identifying a business to its universe of "prospects" through a variety of means, but begins with understanding what the "brand" means. KMIT's brand should stand, first and foremost, for SERVICE.

Branding our "product" involves all those "typical" marketing devices—ads in the Journal, the annual golf tournament, a booth at the annual LKM conference, the annual meeting (which is really a marketing tool, as well as a legal requirement), flyers, handout "goodies", and the like. These have been, and always will be, an integral aspect of branding. What is important is to be able to tie the "message" to the brand. That may be where KMIT can improve some in the future.

Other physical branding techniques may be far obvious, but

KMIT

just as, or important.

as making "label"

obvious, but more,
Things such sure our (seen here)

The above logo is now being put on virtually everything that KMIT puts out, including its new letterhead, along with the colors yellow and purple, all of which are being featured whenever and wherever possible (business cards, information packets, *CompControl* [which converted to a yellow and purple only theme with the last edition], etc.)

Using the KMIT colors and logo to highlight newly-expanded information and quote-bid packets to cities and agents is a great way to get the word out on the KMIT brand.

Agent Participation

Probably the most important factor in KMIT's current "growth spurt" (along with the "hard" market) is KMIT's willingness to "embrace the opportunity" to work through established agents currently servicing LKM cities. Many cities who are NOT currently KMIT members are NOT long-standing good relationships because of with local agents. KMIT is now working very closely with these agents. Working with agents often requires a totally different set of "givens", revolving around how much involvement the agent has had with the city, and how much agent and the city want the agent to continue to have. That range of possibilities is great.

Further, agents sometimes ask an entirely "new" set of questions, etc. from those typically encountered by KMIT. Agents are used to

working in regular insurance markets, NOT pools. Many agents are skeptical of poolsafter all, they have been trained to market insurance in an entirely different way. Working closer with agents mean that KMIT must be willing to be flexible, and be willing to change.

One of the issues which must be resolved by KMIT is the issue of <u>agent commission</u>—whether or not it will remain to be seen as in the best interest of the pool to pay commissions as a line-item expense of the pool as a whole (and not add the commission to the premium) is a question which will likely need to be addressed and answered in the near future.

Conclusion

Marketing is about growth. But, marketing is about more than JUST growth. While it desirable to continue to grow-by adding cities and premium, it is even more important to do those things well which will sustain KMIT Quality service must the long run. maintained—that is what KMIT is, and will always be, about. KMIT's recent growth, from 87 cities at the end of 2000 to (very likely) close to 110 cities by the spring of 2002, represents a significant service-delivery challenge. Any greater rate of growth would very likely strain that service system, and would not necessarily be a good thing for the pool. Marketing is also about continually striving to add to the well-being of the

program, and continuing to add subtle and positive touches to that effort, as well as being always alert to the work comp market and to the needs of our clients—the cities of Kansas.

NOTICE OF NON-RENEWAL

The City of Waterville is hereby given official notice that the **Workers Compensation Insurance coverage** provided to the City through its membership in the Kansas Municipal Insurance Trust (KMIT) **will not be renewed** when <u>the current coverage-year ends at 11:59 PM on December 31, 2016</u>.

The City has not demonstrated adequate improvement in its safety program during its two years (beginning April 1, 2014) in the KMIT pool. This despite the fact that the City joined KMIT after having been cancelled by its former carrier, for poor performance, and the City's assurance to KMIT that it would take the measures needed to improve and emphasize its safety program, and, thus, its performance.

KMIT staff have met with the City on several occasions, to provide guidance, encouragement, expertise and assistance, but the City continues to fail to give sufficient effort toward needed and necessary progress in its own safety planning and activities.

The KMIT pool expects its members to work towards improvement in safety and in their overall work comp program; and, that is especially true for those cities which join KMIT with a poor work comp performance history.

KMIT strongly advises the City of Waterville to <u>immediately</u> seek the assistance of a Kansas-licensed insurance agent/broker in placing the City with a private insurance company doing work comp business in Kansas, as it will likely be difficult to find a private-market carrier for this coverage.

HB 2660 (KSA 75-3036 amendments).pdf

Fee Sweep case participants

We finally have some movement to report on our case. In late March I sent a formal settlement offer to the State's attorneys while waiting for the Court to set our pending motions for hearing. I indicated we would be willing to settle the case on the basis of an agreed order based on agreed findings of fact and conclusions of law that the sweeps were unconstitutional, together with a permanent restraining order. In addition, I said we would agree to accept return to the Department of Insurance, for refund to entities who paid in to the Workers Compensation Fee Fund during the time of the subject sweeps and related assessments, the amount of \$2.355M and the sum of \$100,000 assessed as attorney fees. We would waive repayment of the sums swept from the Bank Commissioner Fee Fund and Real Estate Fee Fund. Further, we would waive our claim for pre-judgment interest. We would be willing to have the sums due based on the Workers Compensation Fee fund sweep to be repaid in FY '17, given the fact that we are approaching the end of FY '16. Finally, I said we would keep the offer open. If, however, the State pursues another motion to dismiss on procedural grounds, in lieu of an answer, this offer would be deemed withdrawn and would not be renewed, at least not on these terms.

I didn't hear back from State's counsel for over a month, during which time we continued to ask the court for a setting. Last Friday we finally got the court to set the case for another status conference and hearing on our pending motions for June 16 at 3:00 p.m. That same day we got a response to our settlement offer.

State's counsel say they have been authorized to propose the following settlement: payment in the amount of \$2.355 million into the Workers Compensation Fee Fund. In addition, they would be willing to pay up to \$100,000 in attorney fees and costs. We would waive repayment of the sums swept from the Bank Commissioner Fee Fund and Real Estate Fee Fund. We would agree to waive any claim for prejudgment interest. Given the approach to the end of FY16 and the beginning of FY17, with the state of the budget as passed and the current timing of this proposal, the State would be willing to pay these amounts in FY18. As a part of this counteroffer the State would not agree to any language that the sweeps were unconstitutional, nor would they agree to a restraining order. The State would not admit any wrongdoing under such a settlement.

We now need to get your input on the counteroffer. We can certainly do this by e-mail or I'm happy to schedule a meeting to discuss the counteroffer. To be honest, I'm pleasantly surprised by the counteroffer. The monetary remedy is considerably more than I had contemplated. At best, I thought they might counter with an offer to pay some attorney fees and prejudgment interest. Return of the funds on the real estate and banking sweeps was always in doubt. Restoration of your attorneys' fees paid is a plus. The WC funds would see return on their double assessment from the original sweep. What we need to evaluate is whether the outcome, which would fall short of a full and final adjudication of the merits of the claimed unconstitutional sweeps, is tantamount to a victory going forward, i.e., would it serve to prevent or deter future sweeps. In this regard, we have 3 things going for us. Of interest is the fact the State has not sought to make the terms of the settlement confidential in any way. We would insist that the terms remain unsealed. With the public and media interest in the case any settlement should be widely publicized. Second, the interlocutory Supreme Court decision we obtained is a decision of record and all but decides the issue. And, while not a final decision, it's pretty definitive and cites the provisions of KSA 75-3036, which is intended to protect such fees from being swept and suggests a remedy. We came close to being able to beef that statute up this past session. HB 2660 passed the House

but was not worked in the Senate. (See attached) HB 2660 would have removed the exception in line 16, beefed up the "thou shall not" language, and set up a notice provision for all fee agencies. I anticipate we can get it passed next session. So, a publicized settlement, favorable Supreme Court decision and existing statute should go a long way toward deterring future sweeps. Nevertheless, we have taken the position up to this point that future deterrence was more important than restoration of funds so I need your candid thoughts and direction.

I have not spoken to the Kansas Insurance Department yet, but will this week and I assume they will be willing to confirm that upon receipt of funds they will agree to refund the assessment to those who paid the second 1% assessment or at least set up an assessment credit. It terms of the timing of the distribution of funds, I'd suggest that if we decide to go this direction that we propose they be paid July 1, 2017 (first day of FY '18) and that the payment of attorney fees occur within 30 days of settlement. There should be no need to wait on that disbursement.

Any monetary settlement will have to go before the State Finance Council so we would make dismissal of our suit conditioned on approval by the SFC. Another advantage of settlement is that were we to obtain an eventual judgment in the court case it might have to go before the Joint Claims Committee where it may or may not be approved. My experience with the State Finance Council is that they virtually always approve settlements recommended by the Attorney General's Office. In the 4 years I served on the Council I don't recall that we turned down a proposed settlement. The Governor serves on the SFC so once approved, the settlement would be included in the Governor's FY '18 budget document.

Let me know if you have questions and let me know whether you wish to have a meeting or have us schedule a conference call. Whatever we decide will need to take the form of a counteroffer. Our next court date is June 16 so we have some time before we need to reply.
